Hello Chief,

Thank you for the opportunity to present at the city council meeting last night. A few community members even stopped me to express their gratitude for the information. Two other community members approached me in the lobby after the meeting, and I had nice conversations with both. One of them had even provided public comment in opposition. I hope I communicated that Flock is invested in helping keep Oak Point safe and supporting privacy and civil liberties. Lastly, thank you to your officers. They were very kind, and I appreciated them looking out for me as I left the meeting.

Please don't hesitate to reach out if you need anything additional from our team. We value our partnership with Oak Point and sincerely appreciate the opportunity to join your community last

Subject: Sharing Concerns About Flock

Good Evening Noah,

I hope you had a restful weekend after spending last week out of town. I want to be clear up front that I am sending this email as a resident and not in my capacity as Chair of PARCs.

I attended Wednesday's City Council meeting and, because I had significant concerns about the Flock agenda item, I took the unusual step of promoting it on Facebook to encourage broader public participation.

I have serious reservations about the use of this technology, and I am deeply concerned by several things I heard at the meeting and have learned since:

1. Lack of a Transparency Portal. The City has had two Flock cameras in operation since 2024, yet no public transparency portal has been established. In my view, such a portal should have been made available to residents on the same day the cameras were activated and should be maintained with regular updates.

2. Absence of Audit Information. No information was provided at the meeting regarding how frequently the Police Department audits its use of Flock. Flock itself recommends at a minimum an annual review. Given the recent legal issues surrounding the Department — specifically, an officer's unauthorized use of police resources to surveil a colleague — a clear, publicly communicated audit policy seems not only appropriate but necessary.

3. Data Retention Beyond the 30-Day Figure Cited Flock retains images for 30 days on its own servers; however, many Texas jurisdictions — including Corinth — upload those images to Texas DPS servers, where they may be held for a substantially longer period. My research suggests retention periods ranging from 90 days to three years, though I acknowledge I have not yet been able to confirm the most current figure. Regardless of the precise timeframe, the retention period is materially longer than what was stated at the meeting. Without an active and updated transparency portal, residents have no way of knowing whether Oak Point is sharing data with DPS or whether the 30-day deletion policy actually applies to our cameras.

4. Proposed Camera Expansion Requires Justification. Chief Tatu indicated that he intends to request eight additional Flock cameras as well as two live video cameras, potentially to be sited at Jake's Place and the boat ramp. I would respectfully request a detailed justification for this expansion. Residents were previously told that the existing closed-circuit camera at the boat ramp was adequate for the Department's needs — that footage would be reviewed only in response to a specific complaint, not monitored in real time. I would like to understand why that is no longer sufficient. I would also like to understand the rationale for placing a live, AI-assisted video feed at a park and playground that sits approximately twenty feet from the Police Department's front entrance. PARCs has been made aware only of minor incidents at that location — repositioning of a sign, movement of picnic tables — which do not appear to rise to a level that would warrant continuous surveillance.

5. Misleading Characterization of Prior Public Discussion. It was misleading for the Mayor and the Chief of Police to characterize this issue as having received substantive coverage in prior public meetings "at least twice." I manually reviewed 36 months of City Council agendas and minutes and found no agenda item referencing Flock or license plate readers prior to Wednesday's meeting. While the Chief may have referenced the technology briefly in routine departmental updates, those references do not constitute a discrete public discussion of the matter. The Mayor's framing suggested that residents had been informed and had simply chosen not to engage — and that implication is not

6. Flock Safety's Contractual and Reputational Concerns Flock Safety's business practices warrant scrutiny. Several municipalities have attempted to terminate their contracts only to find that camera removal is contested, or that Flock has continued collecting data while simultaneously denying the city access to it. Additionally, Flock revised its Terms and Conditions on February 16, 2026, substantially expanding its own authority in ways that may conflict with Texas Constitutional law regarding non-appropriations clauses. I would like to know whether the City Attorney reviews Flock's Terms and Conditions each time they are updated — and I would strongly urge that a thorough legal review be completed before the Department enters into any additional contracts for equipment that could further obligate the City.

7. Long-Term Data Monetization Risk Flock Safety is a privately held company currently valued at approximately \$7.5 billion, and its CFO has indicated that an IPO is a likely next step. Once public, the company will face consistent pressure to demonstrate growing quarterly profits. Given that the physical market for surveillance cameras is finite, I believe it is reasonable to anticipate that Flock will eventually seek to monetize the data its cameras collect. Non-anonymized location data that can be linked to individual residents — and combined with data aggregated by companies such as Palantir — carries significant commercial value and poses serious privacy and safety risks. I would ask the City to consider now what safeguards it intends to put in place for residents should that occur, because by the time it does, the Oak Point Police Department may be so operationally dependent on Flock that disentanglement will be difficult.

My overarching concern is that residents were given no opportunity for public comment before this technology was adopted, and that this situation reflects a broader lack of meaningful oversight by the City over its Police Department. I would respectfully urge the Council to take these concerns seriously and to establish clear, public accountability measures before any further expansion of this program is approved.

Regards,

[REDACTED]

Subject: 5 surprising RTCC uses; How tech helped this PD slash crime by 80%

[View as webpage](#)

Dear Police1 Member,

Welcome to the latest edition of Police1's Real Time Crime Center newsletter — your go-to source for the tech shaping policing today and tomorrow.

Real Time Crime Centers (RTCCs) are rapidly redefining public safety. By integrating live video feeds, license plate readers, mapping tools and more, RTCCs equip officers with instant intelligence to boost response times, strengthen investigations and enhance community protection.

 In today's edition:

- [Leveraging RTCCs for more than just crime](#)
- [Fixing data fragmentation in policing](#)
- [Tech-powered turnaround at San Pablo PD](#)

We encourage you to check out our [full collection of RTCC content](#), and consider how technology impacts the effectiveness and efficiency of policing today. What do you want to learn more about? Email editor@police1.com.

Thank you to [Flock Safety](#), [Leonardo](#) and [Peregrine](#) for supporting this content.

Stay safe,

— Nancy Perry, Director of Content, LE and Corrections

Dear Police1 Member,

There's no question — 2025 is the year of Drone as First Responder (DFR) programs. If your agency isn't already exploring DFR, it will be soon.

But getting started means more than choosing hardware — it begins with identifying how to fund and sustain your program. Police1's "[How to fund Drone as First Responder programs](#)" breaks down what it really takes to plan, budget and launch a DFR initiative, with actionable insights on staffing, transparency and securing grant support. Whether you're starting from scratch or scaling up, you'll find clear steps to move forward with confidence.

[Download it now](#) to position your agency for faster, safer response.

Thanks to [Flock Safety](#) for supporting this essential resource.

Stay safe,

— The Police1 Team

BWC: Man uses stolen cruiser to ram pursuing patrol cars, points shotgun at Ill. officers before OIS

The man allegedly rammed a truck before Macon County deputies responded; he then drove away in an empty cruiser before using police equipment and a shotgun in a standoff

Subject: Flock Safety Webinar- Nova & Freeform Search

Hello!

I'm excited to share that I'll be co-hosting a live webinar on Wednesday, July 23rd at 11am PT / 2pm ET! As you may know, I work almost exclusively with law enforcement agencies that have fewer than 25 sworn officers. This session is specifically designed for smaller departments looking to maximize the value of their investment in Flock.

We'll be diving into two of our newest tools, Nova and Freeform Search, and offering recommendations on how to get the most out of them. If you can't attend live, but are still interested in the content, please

register for the session anyways and I'll send you the recording.

Click [here](#) to register.

Thanks and Stay Safe,

Alyssa Haray
Customer Success Manager

Subject: Re: ORI/Permits

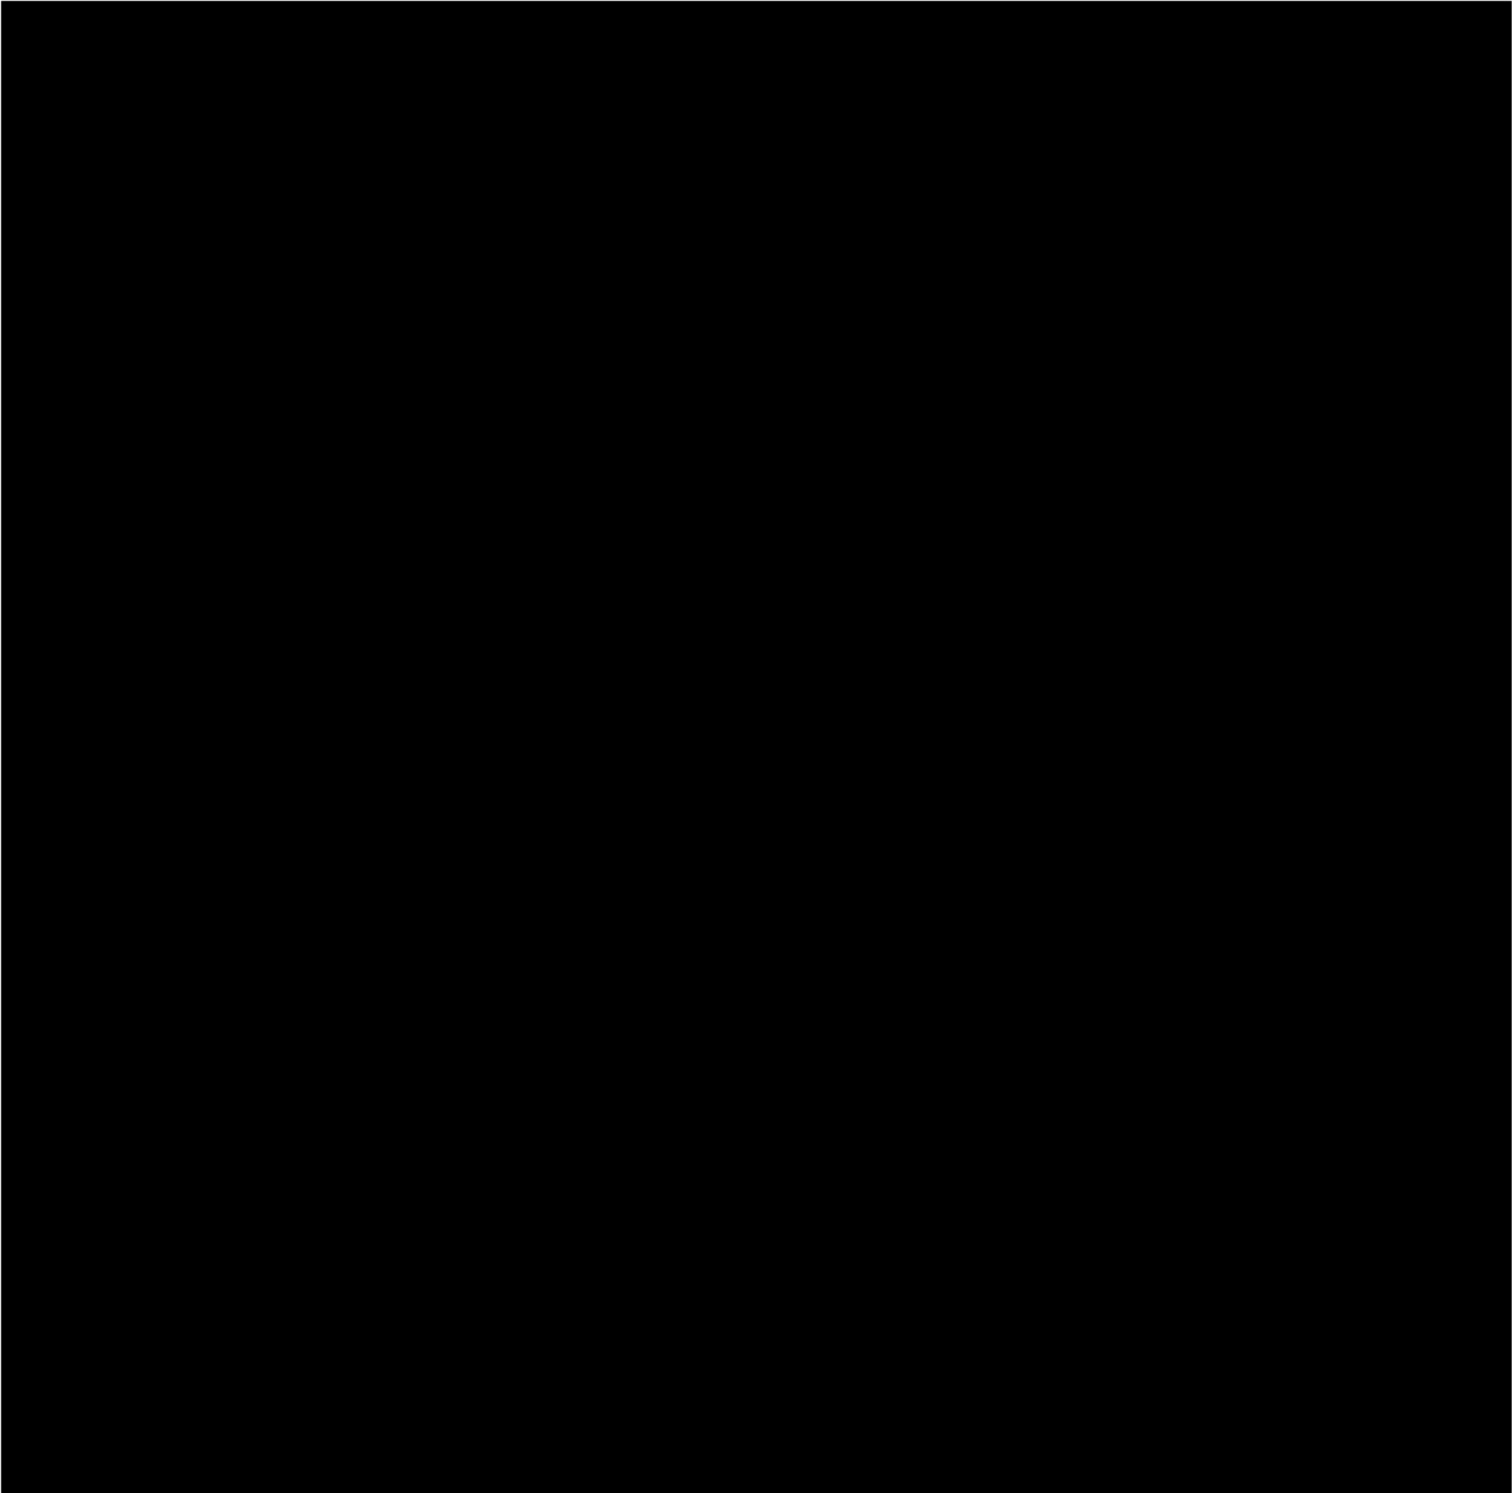

Hi Chief,

Thank you for sending this over and for your time earlier! It was great to meet you and I'm looking forward to supporting your Flock journey!

So good news is I looked at your setup and you were already in the system as Oak Point TX PD owning the Denton Co MUD No. 4 and No. 5 network and we just added in your new network of the products you just purchased. No need to separate anything out with MUD or have them be an admin, everything is all with you and no need to adjust anything!

I did update all your Admin permissions to include your newest add ons as follows: all advanced search features (visual, multi-geo, convoy) plus traffic analytics reporting. I also updated the Sergeant role for the advanced search features as well. I did not give those permissions to your patrol role, so the only thing I would advise is an Admin to update that if you would also like them to have it! Lastly, I updated your sharing preferences, made sharing requests on your behalf as discussed and updated the networks for all your roles.

Please let me know if you have any questions or need anything at all!
Alyssa

Hello!

I am Hanna Radford with Flock Safety, we are working with Oak Point Dept of Public Safety to Install (2) new ALPR cameras. Cameras will be installed on a new 12' pole, similar to a round signpost. Simple construction will affect roughly 1 sq ft of ground, with a hole less than 3' deep, and backfilled with cement. A camera and a small solar panel will be attached at the top. No electrical work is needed. We will call 811s before we dig. I have attached the completed ROW application as well as our plan set, please let me know if you need anything else. **Would it be possible to have this issued sooner then two days before install as we are not able to schedule the installation until we have an issue permit, we have a four week lead time for scheduling at this time.**

Thank you!

Subject: Code Four: AI-Powered Video Analysis for Law Enforcement

Chief Tatu,

I hope all is well. I'm touching base today to introduce myself and put a bug in your ear about Code Four. I joined the Code Four team back in September, after a number of years at both Flock Safety and Fusus/Axon. Texas is part of my territory, so I'm merely reaching out to put Code Four on your radar.

There's a lot of buzz in the industry regarding the use of AI to transcribe audio from BWC footage and auto-generate narratives for reports. While there are a number of players in the space, Code Four stands out due to our use of computer vision models that analyze not only the audio, but the video, as well. This is extremely advantageous in a number of ways:

[REDACTED]

- Analyzing video AND transcribing audio provides much more context and generates more comprehensive narratives than from audio alone
- AI-Powered search allows you to search hours of BWC footage for investigative purposes (i.e. show me yellow cars; show me arm tattoos; etc.)
- Videos are automatically segmented into Key Frames (Miranda Rights, FST's, etc.), Sentiment (calmness, agitation, frustration, etc.) and Evidence (weapons, vehicles, property, etc.) with hyperlinks that prevent having to comb through hours of footage
- Analyze more than just BWC footage - interview room footage, in-car footage, dash cam footage, etc.

I'd love an opportunity to give you and your team a demo of our platform and answer any questions you may have. We're looking for a few agencies to help us get established in Texas, so if you're open to learning more, please don't hesitate to let me know.

Thanks,

Jake Laughlin

Subject: Re: Flock cameras

Hi Chief,

Thank you for your patience. I want to provide an update from our engineering team regarding this matter.

It has been brought to my attention that last week, engineering accidentally made some changes where users were shown LPRs in the VMS tab; those changes were quickly rolled back. Video for LPR isn't being widely released until late December. In this case, it's highly likely, you were briefly able to access this feature and see them before the changes were rolled back.

As far as the shared devices, we took a look at the shared device networks that are shared with your organization that have video (Condor) in the device name, and all of them have VMS disabled. This means your organization will not be able to view, download, or control live video feeds from the

shared network. This is the cause for the shared network stream to appear with the "loading" screen. An admin from the sharing organization would have to restore shared VMS access. I hope this is helpful!
Stay Safe,
Ashley

Subject: Re: Flock cameras

Hello,

Now under video cameras on the VMS tab, shows I don't have any cameras to choose from under owned. It gave me an LPR option last week. It shows I have 1052 that are shared with me. I randomly chose cameras from other agencies, and it's still a blacked out screen for me with the loading icon spinning.

Hi Chief,

Our video engineering team has audited the video cameras and streams, and mentioned they can view video successfully on their end.

Please let me know if this issue still stands true for you all, and if so, were you all able to view video footage on these LPRs before?

Stay Safe,
Ashley

Good Afternoon Chief,

Thank you for reaching out to our Support team! I just did an overview of your live view cameras and don't see anything on my side that would prevent them from showing any feed. Our Support team is furthering the case and reviewing with our engineers, they will be in touch with next steps!

Is it just when you log in to view them or any other users that can't see them?

Thank you,
Alyssa

Good afternoon,

I have two questions, who is our customer success advisor and can you assist with why I can't get a live view from our cameras? After a while, it says session complete, then gives the option to continue.

Subject: Invitation: Flock Sharing & Transparency Webinar Series

Dear Douglas,

At Flock, we recognize the critical importance of data transparency, responsible data access, and compliance with your state and local policies. Many of our customers operate in environments with heightened public scrutiny and evolving legal requirements. In response, we have invested significantly in developing new features that provide greater control, clarity, and oversight over how you share your data.

To support you in navigating these enhancements, we are hosting a series of webinars this month to provide a high-level overview of Flock's sharing framework, introduce our newest sharing and filtering protections, and preview the additional capabilities we will be releasing soon.

During this session, we will cover:

- How data sharing functions within the Flock system
- The structure of a Flock network and how to use system roles to manage access and visibility
- New automation tools that streamline the handling of inbound sharing requests
- How federal agency data-sharing requests are surfaced
- Configurable filters designed to comply with state and local restrictions, including preventing searches related to immigration status or reproductive rights
- Enhanced audit and oversight tools that improve transparency and help agencies meet public disclosure requirements
- Additional upcoming features that further strengthen privacy, policy alignment, and operational clarity

To accommodate your schedule, we are offering multiple sessions covering the same material. Please feel free to register for whichever date and time works best for you.

We look forward to sharing these important updates and supporting your agency's ongoing commitment to responsible and transparent public safety practices.

**Bridge the Gap:
Dispatch and
Real-Time Centers**

[Register](#)

Join Our Upcoming Webinar

You've seen it before: dispatch is working one version of an incident, the Real-Time Center is working another, and the field is trying to sort out the difference. It slows everything down.

On [December 11 at 1 pm ET / 10 am PT](#), leaders from Vacaville and Elk Grove will share how they fixed this problem by tightening communication, building shared language, and aligning workflows across both teams.

You'll hear how they:

- Built simple, shared terminology.
- Brought dispatch and Real-Time Center stakeholders together into early planning.
- Cut delays caused by siloed SOPs.
- Improved everyday communication and morale.

Subject: Fact Check: No Hack. We will never stop fighting for you.

Hi TX - Denton County MUD No. 4 Team,

I'm writing to you directly because I want there to be zero confusion about what's happening.

Flock has never been hacked. Ever.

Flock is CJIS compliant.

Flock does not share, or resell your data. Nor have we ever.

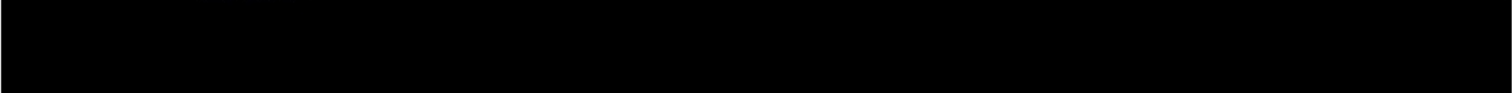

Flock adheres to the highest security standards, including:

NDAA

SOC2 (Type II)

SOC3

ISO 27001

Higher Education Community Vendor Assessment Tool (HECVAT)

FERPA

We are also aligned with the security protocols established by NIST Cybersecurity as well as the Cloud Security Alliance CAIQ framework.

Flock is building tools to help you fight the real crime affecting communities across the country.

Many activists don't like that.

Let's call this what it is: Flock, and the law enforcement agencies we partner with, are under coordinated attack.

The attacks aren't new. You've been dealing with this for forever, and we've been dealing with this since [our founding](#), from the same activist groups who want to defund the police, weaken public safety, and normalize lawlessness. Now, they're producing YouTube videos with misleading headlines. They're also trying to turn a public records process into a weapon against you and against us.

Make no mistake, we're fighting this fight for you, and, I hope, *with* you. I remain committed to building world-class technology to help you keep your communities safe. And doing so in a transparent, secure, and privacy centric way.

Please be on the lookout for more information from our Customer Success and Product teams.

Garrett

POLICE1 WEBINAR

Douglas, thank you for registering for "Building trust in real time: Scottsdale PD's blueprint for a community-connected RTCC," sponsored by Flock Safety. We look forward to seeing you on December 22, 2025 at 12:00 PM PST

Save this email for details on the webinar. Use the link below to enter the webinar up to 15 minutes before the start.

PLEASE NOTE: If you arrive more than 15 minutes before start time, you will need to refresh your browser to start the webinar.

[Join the Event](#)

Email: dtatu@oakpointtexas.com

Launching a real-time crime center is about more than technology procurement — it's about positioning the center as a visible, trusted part of your city's safety strategy. Chiefs want to know how to talk about an RTCC in plain language, how to secure early buy-in from city leadership, and how to introduce cameras and data in a way that reinforces confidence. Scottsdale PD has created a model that delivers on all these priorities.

In this webinar, Scottsdale PD's leadership team will outline how they built an RTCC that aligns with community expectations from the start. They'll share how they talk about their network of more than 6,000 cameras — including 3,500 belonging to community partners — in ways that emphasize collaboration, clarity and shared responsibility. You'll hear how Scottsdale prepares city leaders, engages elected officials and keeps residents informed as capabilities expand, ensuring the RTCC remains a trusted and valued resource.

This session is built for chiefs who want clear, proven guidance on the communication strategies that matter most: how to brief a city council, how to answer public questions about transparency, how to talk about data retention and privacy, and how to make the RTCC feel like a community asset from day one.

Thank you and enjoy the webinar!

Subject: Welcome to Our New Flock Advisory Network

Hi Oak Point Dept of Public Safety Team,

We're upgrading how we support your agency with faster response times, deeper expertise, and more consistent coverage across every part of your journey.

To make sure you always receive fast answers, broader expertise, and consistent coverage, we're transitioning from a single Customer Success Manager to a team-based model through our new **Flock Advisory Network**.

What this means for you:

Your account is transitioning from a dedicated CSM model to a team-based approach, giving you broader access to expertise whenever you need it. This ensures:

- **Faster response times**
- **More consistent coverage**
- **Access to deeper expertise across product, strategy, and adoption**
- **No single point of failure when you need help**

All of your historical context and account details remain fully documented and visible to the team, so nothing is lost in the transition.

How to reach us:

For any strategy, product, or account-related questions—such as training needs, usage insights, renewal planning, or best practices—you can reach the team anytime at:

📧 engage@flocksafety.com

A team member will respond directly.
[REDACTED]

For all other technical support questions you can continue reaching out to

- support@flocksafety.com
- Phone: [REDACTED] (during business hours)
- For urgent assistance, visit the Help Center or call and reference your case number.

Weekly Office Hours

To make things even easier, we'll also be offering **weekly, open office hours** where you can drop in live for questions, best practices, or support with anything you're working on.

We'll share the schedule shortly.

Thank you for your continued partnership and for trusting Flock to help make your community safer. We're excited to support you in this next chapter.

Chief Tatu,

We understand that in this era of unprecedented misinformation, you are hearing many claims about Flock Safety. The recent headlines about our company are largely a result of this environment. The best way for us to clear up these misconceptions and address your concerns is to speak to you directly.

Garrett Langley, Flock's Founder and CEO, is hosting a series of 30-minute, small-group Q&A sessions with himself and other Flock senior executives, specifically for Colorado agencies. These will be candid conversations with chiefs and administrators. No marketing. No spin. Just a clear walkthrough of "headline vs. fact," followed by open discussion, with no question out-of-bounds.

What to expect

- 5–10 minute "Headlines vs. Facts" overview from Flock leadership
-

- Live Q&A / discussion for the remainder of the session
- Small groups (about 10–20 Colorado agency leaders per session) so everyone can engage

Who's invited

- Chiefs, command staff, and administrators from Colorado Flock agencies
- If helpful, please **forward this invite to your City Council members, Mayor, City Manager, or other local officials** who want to hear the facts directly from us.
 - To keep these sessions focused on government partners, we're asking that attendees register with a **.gov / agency email address**.

How to join

Please choose a time that works for you here: [Book a time](#)
(If none of the times fit, reply to this email and we'll find another option.)

I want to emphasize: if you have any specific questions, feel free to reply to me and let me know, so that we can address that directly with Garrett. Thank you for your partnership and for everything you do to keep your communities safe. We hope you'll join us.

Respectfully,
Chris Colwell
SVP, Customer Experience | Flock Safety

Hello,

I'd like this to be completed by every officer. Please assign the following courses to the group of officers:

Patrol Officers and SRO:

Law Enforcement - Search Certification
Law Enforcement User Training Session
Law Enforcement - Alerts Certification
Flock Safety Mobile Application
Enhanced LPR

Lieutenants, Sergeants, and Detectives:

All the above

Commercial Certification
Community Safety Certification
Law Enforcement Admin Group Training Session
Law Enforcement - Administrator Certification
Video Camera Group Training Session
Law Enforcement User Training Session

Please have them submit their certificates to you and fill out the attached spreadsheet. Once completed, please send it back to me. The assignment will be due April 1st as well as incorporated to new officers training schedule.

Subject: Update on Limited Condor Misconfiguration

Chief Tatu,

We recognize that you may have noticed a few recent communications from us. This increased frequency is intentional and directly reflects the feedback we've received from our law enforcement partners, who have emphasized the

importance of staying well-informed about any updates or issues. Our goal is to provide the transparency and timely information you've asked for, so you can remain confident in the reliability and security of your Flock Safety devices.

With that commitment in mind, we are writing to share an update regarding a limited configuration issue identified on a very small number of Condor video devices. No LPR devices, audio devices, or trailers were impacted.

Yesterday, we reached out directly to the small group of customers whose video devices were affected. We are now sharing this broader update to maintain transparency with our entire customer community.

What Happened

The debug interface on a small number of Condor units was temporarily accessible on the internet without password protection. These units were part of a standard testing process used to validate compatibility and reliability with

This debug interface is used solely for troubleshooting. It does not allow for any manipulation of the camera, does not provide access to the Flock cloud, and does not enable access to customer accounts, search functionality, or analytics. The only content visible was live or recorded video comparable to what could be observed from a public roadway.

A website and a sensationalized YouTube channel inaccurately portrayed the extent of this access. Although we do not wish to draw further attention to the video, it is important that you have the facts needed to address potential questions from council members and the public. **To be clear: no sensitive or confidential information was accessed or available.**

Once identified, the issue was promptly corrected, and security updates were deployed across the affected devices. This was a limited, isolated configuration issue and is not indicative of a broader or ongoing concern.

For a more detailed explanation of this event, please refer to our recent blog post: [Update on Limited Condor Device Configuration Issue](#)

We take security seriously at every stage of development and are committed to maintaining the trust you place in us. If you have any questions or would like additional detail, please don't hesitate to reach out. We also encourage you to forward this information to others in your department or to councilmembers so they can be prepared for any potential questions.

Best regards,

Chris Colwell

Chief Tatu,

We're launching a new series called **Office Hours with Flock CEO, Garrett**, and I'd like to invite you to join our initial sessions. The goal is to give you a

This will be a focused conversation, not a webinar. You're being invited as a key leader for your community/organization, with a short update from Garrett followed by open Q&A where you can ask about our strategy, product direction, and how we can better support your mission.

To ensure a live, interactive experience, we are limiting each session to approximately 50 attendees. You will be able to see which sessions still have availability when you register. That helps ensure everyone who joins has a real opportunity to engage, and we'll continue to open additional sessions over time—so you can always return to this registration link to see and register for future dates as they become available.

How To Participate

1. **Register using this link:** [🔗 Register Here](#)
2. **Share your top question in advance** when you register – we'll use pre-submitted questions to shape the Q&A.
3. Feel free to forward this invite to additional leaders from your department/organization if you believe they should be part of the conversation.

We'll send calendar details and joining instructions once your registration is confirmed.

Thank you for your partnership and for everything you do to keep your community safe. We're looking forward to the dialogue.

Best regards,

Subject: Reminder: Connect Your Camera to Power

Hello,

Congratulations! Your camera has been installed by our technicians, but before it is fully functional, you will need to find an electrician to connect it to power.

We have some instructions based on your device type below:

- The camera requires **continuous** 120v or 240v AC power
- Pole must not be mediated by a central timer, source power must remain always on to power the camera
- Installation Steps:
 - Identify the already installed 20 amp disconnect box ~10-14' above grade
 - Locate the AC power source that you will be connecting to the disconnect
 - Open the disconnect to de-energize the connection point (if required)
 - Connect the live, neutral, and ground wires into the corresponding screw terminal
 - Coil and secure any excess cable length and secure neatly on the pole
 - Re-energize the disconnect and ensure the device is powered by confirming the LED on the compute box is illuminated (if PTZ camera, the device will also spin when powered on)

Once you have connected it to power successfully, or if you have any questions, please reply to this email and let us know.

Thank you!

Subject: Upcoming Change to Accessing Flock Academy

Flock Safety

Hello Chief Tatu,

At Flock Safety, we are committed to ensuring that you have seamless access to all learning resources, including our **Help Center**, which offers step-by-step articles, and **Flock Academy**, which provides a variety of courses to help you navigate Flock effectively.

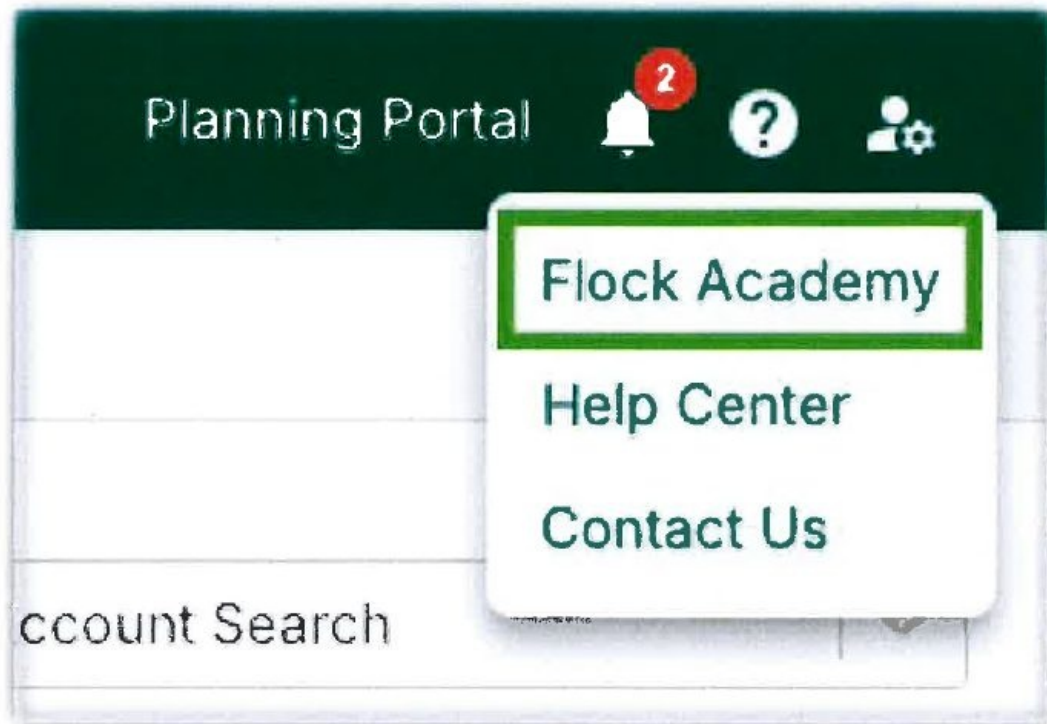

As part of our ongoing evaluation of these tools, we have received requests for the ability to assign Flock Academy courses to team members. Currently, this functionality is limited due to the way users log in. To address this request, we will be changing the login method for Flock Academy.

This update will also:

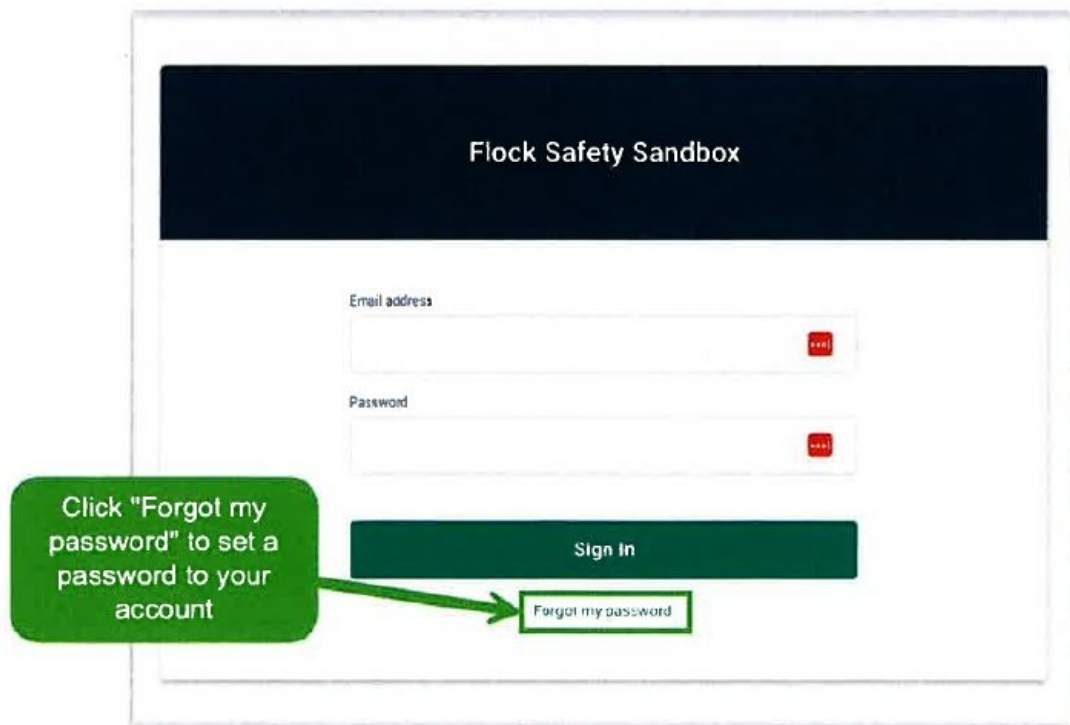

- Minimize issues with certificate generation,
- Enable internal admins to be promoted to **Manager** roles in Flock Academy (instructions to follow later this year), and
- Ensure that user profiles display complete name information.

Important Details:

- **Effective January 30th, 2026, Single Sign-On (SSO) will no longer be used to access Flock Academy.**
- When you click on **Flock Academy**, you will be directed to a login page.

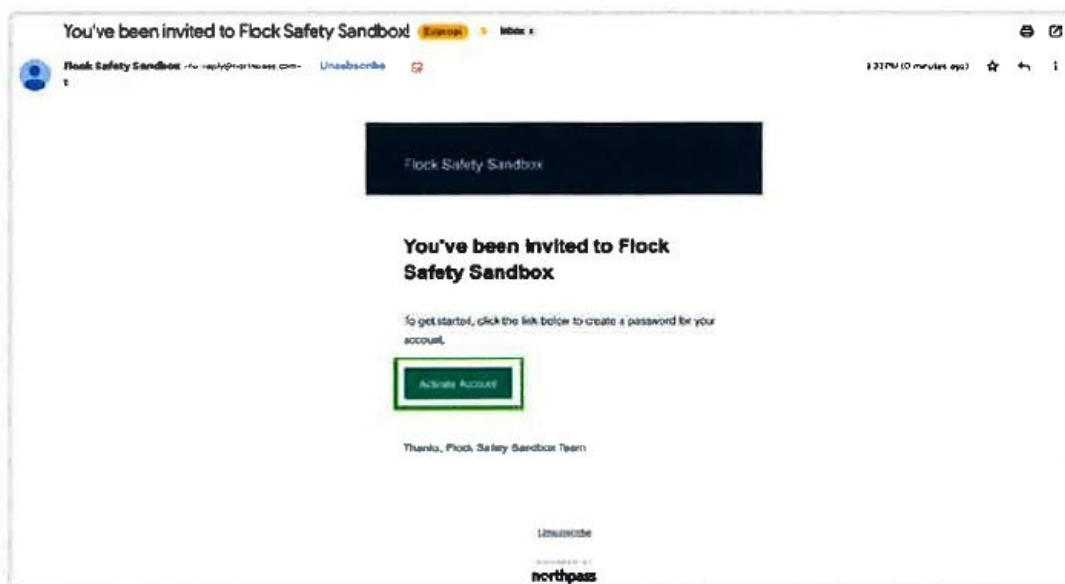

- Click on "Forgot my password".

- Please use the **email address associated with your Flock account**; do **not** use any other personal email.

- You'll receive an email to "Activate Account" with Flock Academy.

- Once you click on "Activate Account", you'll be prompted to update your password. Take this time to also update your profile information such as your **First Name** and **Last Name**. This is an important step to ensure your certificates print out correctly.

Flock Safety Sandbox

My Profile

Make sure the email address you use is associated with your Flock Account.

Make sure your First Name and Last Name are entered.

Set a password to use every time you access Flock Academy.

Adding a photo and updating your profile information is required in order to access certain features. You must be at least 13 years old and have a valid email address. The Flock Academy is not for sale.

Profile Name

First Name

Last Name

Profile Photo

Save Profile

- For all **new users** moving forward, they will receive an email being welcomed to Flock Academy and will follow the instructions on setting up their profile. This will take approximately 2-3 hours to receive.

Questions and Support

If you experience any difficulties or have questions, our Support team is available at support@flocksafety.com. We appreciate your cooperation and look forward to continuing to enhance your learning experience at Flock Safety.

Best,

Email: dtatu@oakpointtexas.com

From: Chris at Flock Safety <chris.colwell@flocksafety.com>
Sent: Tuesday, January 27, 2026 12:18
To: Douglas Tatu <dtatu@oakpointtexas.com>
Subject: Federal Court Upholds Constitutionality of LPR Technology

Chief Tatu,

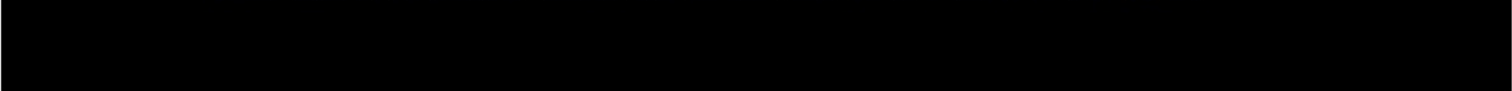

I'm writing to share an important legal update regarding license plate recognition (LPR) technology following a federal court decision issued today in Schmidt v. City of Norfolk, a Fourth Amendment challenge involving the City of Norfolk's use of LPRs.

The court upheld the constitutionality of license plate reader technology as used by the City of Norfolk, dismissing the plaintiffs' claims. This is a significant ruling. As the judge said,

"Despite Plaintiff's counsel's effective advocacy, the Court must conclude that the limited number of photographs available on a 21-day rolling basis from 75 camera track clusters in Norfolk does not 'track' the whole of a person's movements nor does it provide an 'intimate' window into where citizens drive, park, visit, linger, sleep, or patronize."

Importantly, the court's decision aligns with strong national precedent. It recognizes key distinctions between license plate reader technology and other systems that require a warrant, affirming what courts across the country have consistently found: when used responsibly and lawfully, LPR technology does not constitute continuous surveillance and is constitutional. The court also left open the door to future suits on future facts, so we all must remain diligent to operate LPRs with good policy and within the confines of the law.

For your department, the practical impact is continuity. Law enforcement agencies may continue to use LPRs - and the associated functionality within Flock's system - without a warrant, consistent with existing law and policy. There is no change to service, operations, or partnership as a result of this ruling.

We recognize the gravity of cases like this and remain deeply committed to thoughtful, lawful use of LPR technology. Our focus continues to be supporting public safety agencies with tools that respect constitutional boundaries, reflect best practices, and stand up to legal scrutiny.

At the same time, we expect the plaintiffs to appeal. And we are prepared to defend this ruling as the process continues and will keep you informed of any material developments. As always, we value your leadership and partnership, and we appreciate the responsibility that comes with deploying these tools in service of your communities.

If you have questions or would like to discuss the decision in more detail, please don't hesitate to reach out.

Respectfully,

Chris Colwell
SVP, Customer Experience

Subject: Upcoming Change to Accessing Flock Academy

↑ Flock Safety

Chief Tatu,

*NOTE: If you have **already updated your password** for Flock Academy, you can **disregard** this email.*

By now, you may have noticed that accessing Flock Academy looks a little different.

In our previous emails, we've mentioned the need to change how users access Flock Academy in order to meet some other requests that we have received.

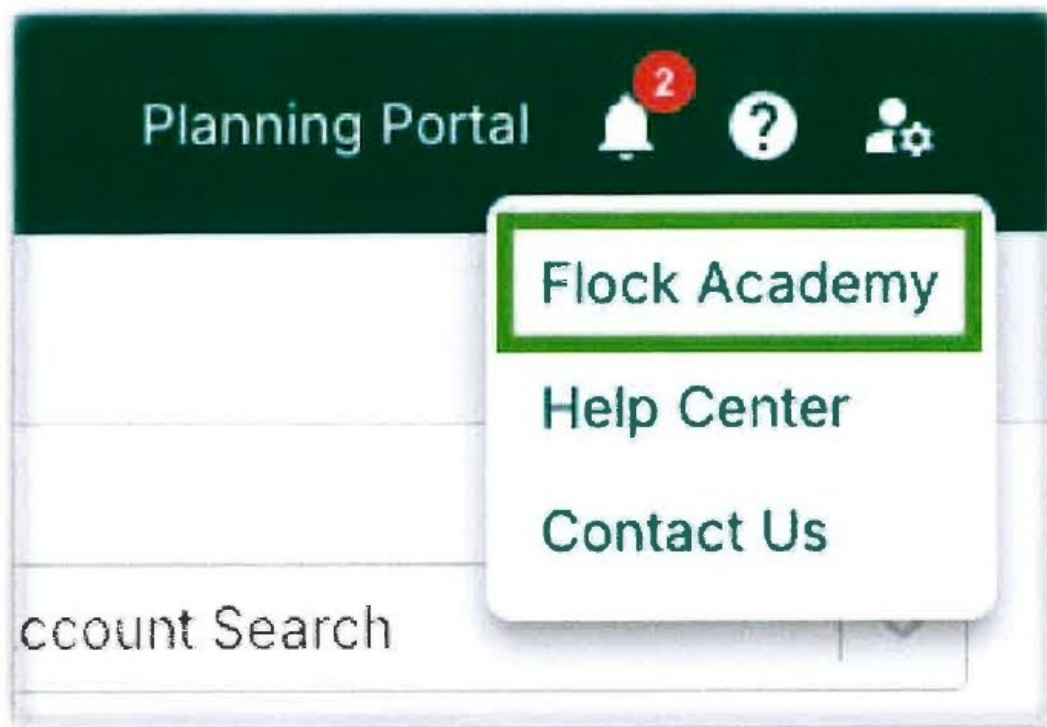

This update will also:

- Minimize issues with certificate generation,
- Enable internal admins to be promoted to **Manager** roles in Flock Academy (instructions to follow later this year), and
- Ensure that user profiles display complete name information.

If you are still having issues logging into Flock, please make sure you follow the steps below:

Important Details:

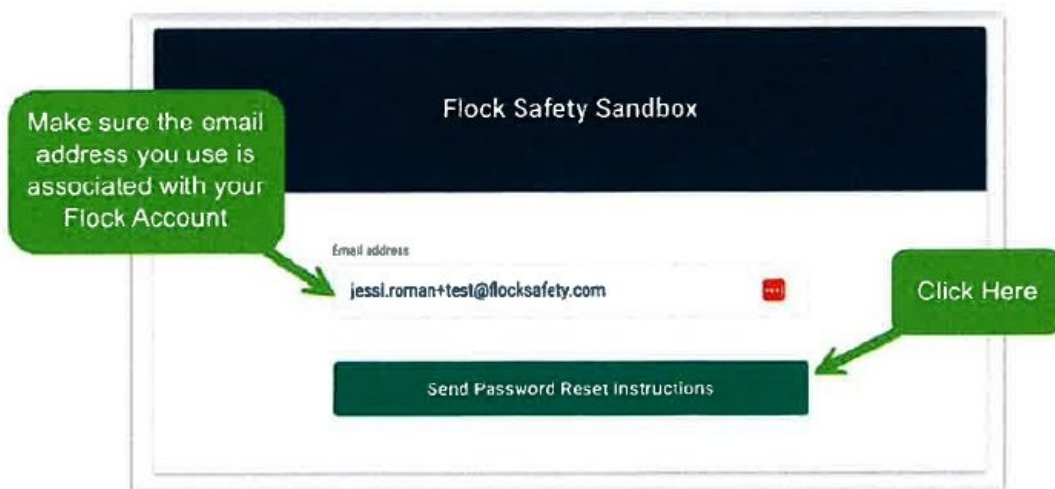

- When you click on **Flock Academy**, you will be directed to a login page.

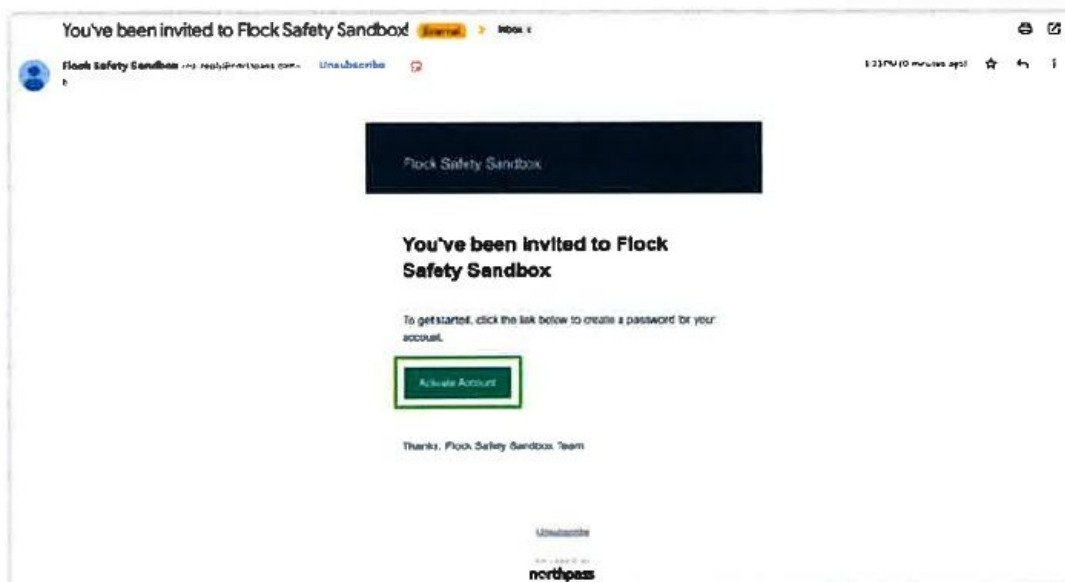

- Click on "Forgot my password".

- Please use the **email address associated with your Flock account**; do **not** use any other personal email.

- You'll receive an email to "Activate Account" with Flock Academy.

- Once you click on "Activate Account", you'll be prompted to update your password. Take this time to also update your profile information such as your **First Name** and **Last Name**. This is an important step to ensure your certificates print out correctly.

The screenshot shows the 'My Profile' page in the 'Flock Safety Sandbox'. The page has a dark blue header with the text 'Flock Safety Sandbox' and a 'Sign In' link. The main content area is white. On the left, there are three green callout boxes with arrows pointing to specific fields: 'Make sure your First Name and Last Name are entered' points to the 'First Name' and 'Last Name' fields; 'Set a password to use every time you access Flock Academy' points to the 'Password' field; and 'Make sure the email address you use is associated with your Flock Account' points to the 'Email' field. The 'My Profile' section includes fields for 'Email', 'First Name', 'Last Name', and 'Password'. Below these fields is a 'Save Profile' button. To the right of the profile fields is a section for a profile picture, featuring a placeholder image of a black and white geometric pattern and a 'Upload Photo' button. Below the profile picture section is a small text note: 'The following information was captured by Flock Safety software.'

- For all **new users** moving forward, they will receive an email being welcomed to Flock Academy and will follow the instructions on setting up their profile. This will take approximately 2-3 hours to receive.

Questions and Support

If you experience any difficulties or have questions, our Support team is available at support@flocksafety.com.

We appreciate your cooperation and look forward to continuing to enhance your learning experience at Flock Safety.

Best,
Customer Education Team @ Flock Safety

Subject: Flock Safety Webinars| Enhance Your Proficiency with Flock Safety

Hello,

We are pleased to announce our schedule of webinars throughout February and March, designed to maximize your utilization of the Flock Safety platform.

Please review the schedule below and register for the sessions most pertinent to your role and needs:

February Webinars

- **Role Management (Administrator Focus)**
 - This session provides an in-depth examination of role management, specifically tailored for the Administrator user. Attendees will gain a comprehensive understanding of creating roles, common role classifications, features frequently enabled at the role level, the process of adding networks to roles, and how to initiate share requests.
 - **Date & Time:** February 10, 2026, at 2:00 PM EST
 - **Registration Link:** [Register Here](#)
- **Sharing and Filters (Administrator Focus)**
 - This webinar will offer a high-level overview of Flock's sharing framework and introduce the newest enhancements to our sharing and filtering security protocols.
 - **Date & Time:** February 19, 2026, at 2:00 PM EST
 - **Registration Link:** [Register Here](#)
- **Flock Safety Solving Cases with Live Video and LPR (All Users)**
 - Encourage investigative use of Live Video in conjunction with LPR. Users will gain an understanding of how to use the features of the VMS tab and hear about success stories involving live video and LPR.
 - **Date & Time:** February 25, 2026
 - **Registration Link:** [Register Here](#)

March Webinars

- **Sharing and Filters (Administrator Focus)**
 - This session will provide a comprehensive overview of Flock's sharing framework and introduce the latest updates to our sharing and filtering security protections.
 - **Date & Time:** March 3, 2026, at 2:00 PM EST
 - **Registration Link:** [Register Here](#)
- **FlockOS: An In-Depth Analysis of Real-Time Features (FlockOS, All Users)**
 - This webinar will overview the new features and functionality enhancements implemented within FlockOS, including the selection tool, the response planner, and the utilization of zones.
 - **Date & Time:** March 11, 2026
 - **Registration Link:** [Register Here](#)
- **Role Management (Administrator Focus)**
 - This deep-dive session on role management is specifically structured for the Administrator user. Attendees will depart with a solid comprehension of role creation, common role profiles, features typically enabled at the role level, methods for adding networks to roles, and procedures for submitting share requests.
 - **Date & Time:** March 24, 2026, at 2:00 PM EST

6/29/26, 9:50 AM

Mail - Stephanie Aguirre - Outlook

- registration email. [Register Here](#)

It remains our commitment to continuously provide webinar-based training on diverse topics, ensuring that all users, regardless of their specific role, have the opportunity to participate and enhance their skills

Hi Douglas,

I'm Lisa, VP of Customer Success at Flock Safety. Your voice is incredibly important to us, and we'd love to hear from you.

We're asking you to complete a very short NPS survey—it takes less than 60 seconds. Your feedback gives us powerful insight into what's working well for you today and where we can continue to raise the bar. Every response is read closely by our team and directly shapes how we invest in making your experience even better.

When you take a moment to share your thoughts, it not only helps us improve but also highlights what's creating value for you, so we can do more of it.

Subject: Flock

Hello,

I just thought I'd mention this. I had applied for the MVCPA grant that would have assisted with the flock camera project; however, the application was denied because it was submitted a day late.

At that time, we were informed that there was approximately \$100,000 remaining in grant funds, restricted for public safety use. I met with the Mayor and Lyle, and they approved allocating those funds for this purpose. I signed off on that decision. We didn't exceed the threshold of \$50,000 which is why I asked for permission from the acting City Manager and Mayor at the time.

Currently we're still awaiting permit approval from TXDOT. Currently, only two cameras have been installed. The cameras designated for the park and boat ramp will replace the existing ones and will be configured to store footage in a CJIS-compliant cloud system vs. the consumer purchased system currently in place.

Subject: Flock Safety - Final Steps!

Hi Gents,

Thanks for both of your commitments to getting this across the line last week!! A few more things, I promise I'm not this annoying!!

1. Contract - I sent it out for signature via docusign to you, Chief Tatu and attached the contract here for your records. It has the opt out language just above the itemized products. To confirm what I said last week, you can sign today to get your logins and get onto the software platform, but your 60 day trial won't begin until after the first camera is installed. There is about a 5 month turnaround time for TxDOT to approve permits so while we wait for your award letter and funding, we work on the backend to gather all the permits necessary.

2. Locations - [Here are the locations](#) we've mapped out for your review. Let me know if you have any questions or if everything looks good. If everything does look good, please reply back with a "yes" or "can move forward". This verbal confirmation gives our Permitting team the greenlight to begin the paperwork required for each camera in the state of Texas.

3. Resolution - Can you paste the below in a word doc and have your City Manager sign it as a resolution? MVCPA is very forgiving on late resolutions - I just want to get it into them this week. You can email it along the same thread that Lt Bosowski was emailing them through last week or start an
[REDACTED]

entirely new thread. Just please remember when sending them anything add your agency name and ORI number and state that this is the resolution for your application.

FY 26 SB 224 Catalytic Converter Grant Program for Oak Point PD

WHEREAS, Under the provisions of the Texas Transportation Code Chapter 1006 and Texas Administrative Code Title 43, Part 3, Chapter 57, entities are eligible to receive grants from the Motor Vehicle Crime Prevention Authority to provide financial support to law enforcement task forces and agencies for economic motor vehicle theft, including catalytic converter theft.

WHEREAS, Lieutenant Brian Bosowski with the Oak Point Police Department is designated as the Authorized Official to apply for, accept, decline, modify, or cancel the grant application for the Motor Vehicle Crime Prevention Authority Grant program and all other necessary documents to accept said grant.

BE IT RESOLVED, The City of Oak Point supports the Oak Point Police Department in their MVCPA application.

City Manager of Oak Point

As always, text me if you need me!

Hi Alexandra,

Thank you for your continued efforts with this. I'm familiar with DOT's lengthy permit process unfortunately.

When I click on the link, it takes me to a planning center search bar, and when I type Oak Point PD it says an error occurred while searching for accounts. Is it under a different name?

Hi Chief!

I wanted to share the new locations our team identified for [REDACTED]. These locations are on DOT right-of-way and will require permitting through the DOT. If you haven't previously permitted through the DOT, please note that the process can be somewhat lengthy and typically takes three to six months from the time of submission.

Could you please use the link in my email signature to review the proposed locations and let me know your thoughts?

On Tue, Dec 2, 2025 at 1:50 PM Alyssa Haray <alysa.haray@flocksafety.com> wrote:
Good Afternoon Chief,

We can absolutely move them from private property and discuss alternatives. We'll have to set up time with our Deployment Specialist to look at what would be possible and match your goals, can you please provide some times/days over the next 2 weeks that work best for you?

Regarding the electrical work, just wanted to let you know for camera  we have our electrical program manager swinging by most likely tomorrow to review this location. We'll know more after speaking with him to get that one connected but for the remaining AC powered devices being installed we have 2 options. Option 1. We can switch the agreement to have us do the electrical work. This would require a contract amendment for signature for completion as well as a realignment on timeline. Since our electrical capacity is smaller, our team is typically booked out 6-8 weeks in advance, this can add time to an install to complete hooking up to power as our technicians are not electricians. Or Option 2. We can keep the agreement as is, with you owning the electrical work typically we see PDs have their Public Works department come out and follow the guide to complete this. Typically is our standard route as it is the fastest.

We understand the frustration here and want to make this as smooth as possible for you and your department to complete your installs. As mentioned we can provide a concession in the form of a credit to your next invoice or extension to your contract for the inconvenience here. Please let us know how you would like to move forward with the electrical options.

Thank you!
Alyssa

Subject: Re: Oak Point PD: Welcome to Flock!

Hi Chief!

Thank you for sending the . I'll get this pushed forward and request that an installation date be assigned.

For the other two locations on city property, thank you for providing contact information. I'll have the team reach out to the permit technician as soon as possible to obtain the necessary approvals. I'm confident we can get these approvals quickly.

Regarding private property permission, this is something Flock has historically not handled. Since we do not have existing relationships with private property owners, we ask that the customer manage this part of the process. I did review the communications, and Charmissa and Brittany did cover the process early on; however, I apologize if the process was unclear. To make things easier, we do have a simple template you can use to obtain the required written approval. I will
